| JUNE 24. | | AUGUST 19. |
| JULY 22. | | SEPTEMBER 22. |
| OCTOBER 14. | | |

To Commence at 7.30 p.m.

REPORT.

DURING the fourth year of the existence of the Auckland Institute the general interest in its work has continued unabated, and the Council has pleasure in being able to point to a few indications of progress amidst circumstances calculated to cause discouragement.

The third volume of the "Transactions of the New Zealand Institute" has been supplied to the members free of cost, and has excited considerable interest throughout the Colony. The Council gladly acknowledges the great importance of the yearly volume, the joint production of the various societies affiliated with the New Zealand Institute, in promoting and maintaining an interest in the progress of science.

Seven meetings have been held during the past year, at which business relating to the progress of the Institute has been freely discussed, and the following papers have been read :—

1. On the Cryptogamic Botany of the Auckland Isthmus ;—by T. KIRK, F.L.S.
2. On the occurrence of Footprints of the Moa at Poverty Bay ;—by Archdeacon W. L. WILLIAMS.
3. Notes on the Discovery of Footprints of the Moa at Poverty Bay ;—by T. B. GILLIES.
4. Notes on a New Locality for the Tuatara ; also on a Variation of the Egg of the North Island Kiwi ;—by T. KIRK, F.L.S.
5. On the Alluvial Deposits of the Lower Waikato ;—by Capt. F. W. HUTTON, F.G.S.

AIM Ann Report

1872

6. On the substitution of Vulgar Fractions for Decimals in the Compilation of Mathematical Tables;—by J. R. PREECE.

7. On the Nativity of Polygonum aviculare in New Zealand;—by T. KIRK, F.L.S.

8. On Eclipses;—by T. HEALE.

9. A Description of a Simple Form of Rain Guage;—by Archdeacon W. L. WILLIAMS.

10. On Megapodius Pritchardii;—by Captain F. W. HUTTON, F.G.S.

11. On the Botany of the Titirangi District;—by T. F. CHEESEMAN.

12. On the New Zealand Asteliads;—by T. KIRK, F.L.S.

13. Description of a Mode of Communication between a Station on a Line of Railway and a Train in Motion on the same Line;—by G. RAYNER.

14. An Account of the Foundation of the Lighthouse in the Punui Passage;—by J. STEWART, C.E.

15. A Comparison of the Indigenous Floras of the British Islands and New Zealand;—by T. KIRK, F.L.S.

16. On the Local Distribution of certain Plants common to the British Islands and New Zealand;—by T. KIRK, F.L.S.

17. Notes on a Thermal Spring near Helensville;—by ROBERT MAIR.

18. On the New Zealand Pittosporads;—by T. KIRK, F.L.S.

19. On the Defence of Auckland Harbour;—by S. J. STRATFORD, M.R.C.S.C.

20. On the Habit of Growth of the Rata (*Metrosideros robusta*);—by T. KIRK, F.L.S.

In July the Council resolved to have the Museum and Library lighted with gas, and kept open to the public until 9 p.m. on every Wednesday; this step has been attended with good results in increasing the number of visitors, and widening the circle of those interested in the maintenance of a Public Museum.

The serious disadvantages under which the Institute labours from the dilapidated and unprepossessing appearance of the building has long occupied the attention of the Council. In June last it was found absolutely necessary to take down a large portion of the old building, and the Council determined to make an effort to procure funds for erecting the first portion of a suitable structure for a Public Museum and Free Library. It was proposed in the first instance to utilise rather less than one-half the site by erecting thereon a galleried building extending from Princes Street to the rear, making the necessary provisions for the future adoption of the permanent level of the street, and leaving the actual construction of the galleries for a future time. This building would have formed a portion of one design for the entire site, and was estimated to cost in the first instance about £2,500.

With a view to more efficient action towards obtaining the necessary funds, it was determined at a general meeting to increase the number of members of the Council to eleven, when Dr. J. L. CAMPBELL, Mr. T. RUSSELL, and Mr. J. M. CLARK were elected. A printed circular was issued, and a canvas for subscriptions commenced. The late Dr. STRATFORD at once liberally promised £100 on condition of the sum of £400 being raised in amounts of not less than £50; and on his lamented decease it was found that the promise had been confirmed by bequest.

It was speedily found that there was a decided opinion amongst the friends of the movement, whether members of the Institute or not, that the large donations required could not be reasonably expected, unless the Provincial Government would supplement the contributions of private individuals. Application was therefore made to the Provincial Executive to place the sum of £1,000 on the Estimates for the Session, as a grant in aid of the fund. This application was accorded to on condition that at least an equal sum was raised by private subscriptions,

AIM Ann Report

1872

and on this understanding liberal promises of subscriptions were obtained. Dr. STRATFORD'S bequest would have been assured, and the whole of the money required by subscription for the first part of the building obtained, but for the unfortunate refusal of the grant in aid by the Provincial Council; and although an attempt was made to meet the views of its opponents, by an arrangement to secure the substantial brick building used as the Wesleyan Chapel in High-street, a second effort to obtain the necessary support was frustrated by a small majority.

It is not the place of the Council to point out the causes which led to the refusal of the grant; but it must be evident that the loss of Dr. STRATFORD'S liberal bequest, and of the handsome subscriptions by which it was secured and supplemented, must seriously affect any future attempt to collect a Building Fund. In the Southern Provinces buildings for Public Museums are erected, and the expenses of their maintenance defrayed by the respective Provincial Governments. In Auckland the Institute has failed to secure the support of the Provincial Council in supplementing the contributions of its inhabitants towards this object.

But it is obvious that the question of new buildings cannot remain in its present position; the Institute must either abandon the attempt to carry out the purely public objects of a Free Library and Museum, from its unaided resources, or suitable buildings must be erected; and the Council would earnestly recommend that a renewed effort be made to procure a grant in aid of the Building Fund during the coming session of the Provincial Council.

The Council desires to place on record the high sense it entertains of the unwearied efforts of the late Dr. STRATFORD to promote the welfare of the Institute from its formation, and of his munificent offer in aid of the projected Building Fund.

As on previous occasions, the Council has to acknowledge with pleasure numerous and valuable donations to the Library and Museum, especially that of a large number of valuable works from Captain F. W. HUTTON, F.G.S., whose removal from the province is a serious loss to the working power of the Institute.

Owing to a misunderstanding respecting the apportionment of the Provincial grant referred to in the last Report in aid of the Museum and Library, some delay has resulted in the purchase of the selected books and special objects for the Museum. Eighty volumes have, however, just been added to the Library from this source, and the purchases for the Museum are now on their way from England.

The Council would again request the assistance of the members in furthering the interests of the Institute, by advocating its objects in their circle of friends; by contributing records of observations of natural phenomena, or of critical investigations to be read at its meetings; by donations to the Library and Museum; or by such other mode as may conduce towards these desirable ends. Few institutions are so well calculated to advance the diffusion of knowledge, and to promote alike, pure taste, intellectual pleasure, and material advancement, as those which this Institute seeks to establish in Auckland—a Free Public Library and Museum.

The Auckland Institute in account with J. Kirk, Treasurer,

FEBRUARY 21, 1871, TO FEBRUARY 19, 1872.

Impure Selenite, Thames—T. B. Gillies.

- 3 Models Eggs of the Moa ; 2 ditto of the Apteryx—The Director of the Colonial Museum.
Moa Bones, from Turanganui—Archdeacon W. L. Williams.
2 Rock Specimens—The Hon. H. Chamberlin.
Metallic Arsenic, Coromandel—E. B. Dickson.
3 Rock Specimens, Chatham Islands—Ritchie.
Retinite, Hikurangi Coal Mine—R. Mair.
A Fine Amethyst—D. M. Beere.
5 Specimens Arsenic, richly impregnated with Gold—The Directors of the Tokatea Goldmining Company.
Alluvial Gold ; Native Platinum—D. L. Murdoch.
Ruby Copper ; Vitreous Copper ; Nephrite, Great Barrier Island—T. Heale.
Selenite—Dr. Stratford.
Brown Hematite, Kaipara—W. J. Palmer.
Crystallized Limestone, and other Rocks—T. Russell.
Two Aniferous Specimens—C. Tothill.
Specimen of Mangawai Building Stone—P. A. Phillips.
Stalactites, Whangarei—H. A. H. Munro.
- Skin of Wild Dog, Kaipara.—E. and J. Coates.
100 Queensland Bird Skins, and two cases Queensland Insects.—Presented by special subscription from Messrs. Gillies, Firth, Wright, Heale, Mackelvie, Russell, J. Farmer, G. B. Owen and Wardrop.
2 Skins Xenicus Stokesii.—The Director of the Colonial Museum.
1 Skin Graculus carboideus ; 2 ditto Graculus varius.—Dr. Fox, Shortland.
2 Eggs Astrelata Gouldii ; 4 ditto Larus scopulorum—Wardell, Kitakita.
Skin of Large Tern—Madden, Grahamstown.
Skin of Prion Banksii.—Rev. A. G. Purchas.
Eggs of Ocydromus Australis, Coturnix Nova-Zelandia, Zosterops lateralis, Charadrius bicinctus.—The Director of the Colonial Museum.
Skins of Albatross and Cape Pigeon—J. Ariel.
1 Parroquet, set up—Ross.
Skin of Ossifraga gigantea—Captain Johnston.
- Solenognathus Spinosissimus, and Ovarian Porpoise—A. Vilcoq.
Serpent Eel, Port Charles—J. Marsh.
3 Mud Fish, Neochana apoda—D. L. Murdoch.
Pipe Fish—J. Matthews.
Small Shark—W. Knox, cutter 'Lily.'
A Lizard, Naultinus Elegans—A. Vilcoq.
2 Frogs, Waiwaka : Peculiar Worm, from fresh water streams, Opotiki ; Sand Worm, Ohia—Major Mair.
Helix Busbyi, &c.—R. Cornish,
Phasianella, and other Shells—Wardell, Kitakita.
Shells and Cirrhipedes, Bay of Islands—J. K. Davis.
Naultinus elegans, var.—D. M. Beere.
Echinus, Pacific Islands—Dr. Wright.
Cirrhipedes, Ourakei—C. Saunders.
80 New Zealand Shells—The Director of the Colonial Museum.
A Large Prawn captured at sea ; A Spider, Honolulu—H. A. Mair.
New Zealand Shells—C. Matthews.
New Zealand Shells—T. Kirk, F. L. S.
